

Aurelio Riccioli

- Zur Person

"A lot of people feel themselves overwhelmed by our time events and despair of the power of creative ideas. They "wait" until "conditions" will create more favorable situations. But "conditions" will never create nothing more that will be plant in them by human ideas."

I've approached Antroposophy in 1992 but just in the last years I've decided to give my contribution to the presentation of Threefolding ideas as the social question is mainly an awareness problem. I feel that only this awareness can shape the unconscious social urges of our time in order to lead our society to a better one.
